### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: as stated in the previous office action the subject matter of previous claims 29 and 30 defined patentable subject matter. In review, the prior art neither taught nor suggested injecting the electrolyte into an area interior to the flow through anode. Additionally, the prior art, Sandoval et al (US 5,492,608) expressly taught away from placing the electrolyte injection ports anywhere except for the middle area of the cell, thus teaching away from placing it on the floor or ceiling of the cell.

2. Additionally, no obviousness-type double patenting rejection is made based on claims in applications 10/907,638 or 11/162,341 because the features discussed above do not appear in the claims in those applications.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
